## Save costs with PACTware™

Being a member of PACTware Consortium e.V. entitles you to the PACTware Operating Tool which has become de facto standard in the small business sector. Your investment will be a long-lasting one, thank to the continuous joint development and common use of PACTware by the member companies.

### Your membership includes:

- Use of PACTware, an FDT compatible solution for the operation of your field devices
- Access to FDT technology
- Avoiding the cost-intensive development of your own Operating Tool
- Direct influence on the specification and the continued development of PACTware
- Use of PACTware source code (as a full member)
- Use of the FDT engine to develop your own Operating Tool
  - the FDT Engine takes over all FDT specific tasks and allows the member to concentrate on the important functions of his software
  - the FDT Engine ensures FDT compatibility
- Participation in marketing and other events (e.g. PACTware Roadshow)

## Become a member

## Full steam into the future

PACTware has integrated the FDT interface. The FDT (Field Device Tool) is the standardisation of the interface between field device and Operating Tool. This standard makes it possible to operate and configure devices easily, rapidly and efficiently

### The advantages speak for themselves:

- Standardised interface for the integration of any field device
- A system-wide Operating Tool for devices and systems
- Rapid and efficient integration of HART, PROFIBUS, FOUNDATION fieldbus devices and devices with any interface

**Use our strength to your advantage!**
